PROFESSIONAL EXPERIENCE

WAREHOUSE ASSOCIATE. Amazon (2018 – Present)

Responsible for the inbound processing shipments according to company policies and procedures.
Performs all work in accordance with established safety procedures. Worked at a rapid pace to meet tight deadlines

WEB DEVELOPER CMG.tech (2010 – 2018)

I have been a lead web developer and coordinator for website reporting for more than 13 years, working on all aspects of the development life cycle including front end and back end design, custom site tools, visitor analysis and data processing. Tag management systems (TMS) supplied data where I used back end technologies of Perl, Linux, PHP and MySQL. I gathered additional external data via custom created JSON, XML and/or SOAP API systems. Front end programming, designed and implemented by me, included HTML, CSS, JavaScript, AJAX and jQuery.

Created a comprehensive Bootstrap Dashboard website where customers can check core website metrics, sales inquiries and WebTraxs performance.

Designed, created and maintained an ROI email reporting system using PHP, MySQL, HTML, and CSS. An email blast was sent quarterly to all sales personnel detailing visitor and ROI tracking tool activity on their client's web pages.

Created numerous custom ad hoc analytical report requests from extensive databases for time-sensitive data analysis for our customers. Created Perl, Linux and/or PHP scripts with MySQL queries to output reports in CSV, PDF and TXT formats.

Responsible for training and integrating new staff into development activities.

DEVELOPER / PROGRAMMER Creative Media Group (2005 – 2009)

Website reporting developer where I created several generations of reporting systems which allowed customers to analyze their web programs and track visitors and their actions. Skills included programming in HTML, CSS, JavaScript, A JAX and PHP. Created and managed MySQL databases. Wrote scripts in Perl and Linux to import data via CSV files, API and FTP file transfers, with several using the cron utility. Setup a single sign-on (SSO) user authentication service for user accounts, created backups and set up synchronizing of data across several servers.

Converted an extensive sales generating CD using PHP, MySQL, HTML, and CSS to the web where sales personnel can run hypothetical sales package mixes on customers and determine possible outcomes.

PROGRAMMER Creative Media Group (1999 – 2004)

Wrote bash and Perl scripts to process daily/weekly croned batch data processing of customers websites. Created a software system for quickly generating web-friendly, printable downloadable reports from MySQL queries. Designed, developed and implemented an industrial news article website using PHP, MySQL and HTML and JavaScript.

INDUSTRIAL MANAGEMENT Van Leeuwen Pipe & Tube Corp. (1982 – 1998)

Prior to my career in software development I spent several years working for Van Leeuwen Pipe & Tube Corp, where my duties included:
Account Representative - Effectively maintained dozens of customer accounts in a heavy volume sales office.
Product Management - Managed the purchasing, procurement and distribution of a five-million-dollar inventory.
Supervision of Union Tradesman - Supervised the successful operation and maintenance of ten buildings, a mixed fleet of diesel trucks and warehouse equipment.
Management - Coordinated the receiving of hundreds of work orders, determined priorities, met crucial deadlines, managed union employees, and maintained quality control.

EDUCATION

Rutgers, the State University of New Jersey
Diploma in Full Stack Web Development – 2020

The CHUBB Institute
Diploma in Computer Programming – 1998

Fairleigh Dickinson University
MBA Finance – 1987

Rowan University
BS Business Administration - Industrial Management – 1982

INDEPENDENT COUSEWORK

Udemy (2018): Courses taken in MongoDB 3, NodeJS, AngularJS and PHP MVC Framework (certificates available upon request)
